

Datamine Discover One Day Workshop

By

Datamine International Ltd.

6th March - Sofia & 8th March - Belgrade 2019 @ 09:00- 5:30

Introduction

Datamine announce a workshop with practical uses of Datamine Discover Suit of Products. Datamine would be glad to see all interested participants into this workshop on March 6th in Sofia & March 8th in Belgrade, 2019.

Datamine is a world leading provider of mining software technology and services that are required to plan, manage and optimize mining operations. Our solutions span the entire value chain across exploration geology, geostatistics, resource modelling, mine planning and operations management.

In 2017 ; under the Constellation Software Inc. we have acquired Pitney Bowes' MapInfo Discover suite. The **Datamine Discover Suite** is designed especially for the Mining and Exploration industry. It provides a seamless suite of tools for compiling, visualizing, analysing, and mapping 2D and 3D spatial geoscience data. Built on the highly regarded MapInfo GIS platform, our sophisticated range of products can take you from assessing ground for acquisition through to drilling and basic resource modelling of your mineral assets. If you're an explorer, environmental consultant or mine geologist, Datamine Discover will enhance your productivity by leveraging superior tools to complete your day to day tasks.

The focus of this Workshop will be on the **Datamine Discover Suite** products, to understand the use , the configuration of these products and the benefits to users. In addition, the workshop will also highlight upcoming innovative developments.

Participants will gain a working knowledge of the Datamine MapInfo Discover application and GIS concepts through class room exercises, real-life working examples and teacher interaction.

Achievement

This seminar is suitable for all levels of expertise and will introduce the followings :

- **Introduction to the user interface.**
- **Understanding MapInfo Pro tables and workspaces.**
- **Map windows.**
- **Importing GIS data.** - Image registration, ASCII, CSV, Geopackage, Raster, LIDAR
- **Hydrological Analysis**
- **Introduction to querying Geological data** – Spatial and attribute selection
- **Digitising geological data.**
- **Exploration targeting.**
- **Geochemical interpretation** – Correlation Matrix, Data Classification, Statistical Calculations

Sofia-Belgrade

- **Display and analysis of drillhole data.**
- **Data Visualization in 3D**

Course Schedule

The course will be held on March, 6th in Sofia & March 8th in Belgrade, 2019 between 9:00 AM- 5:30 pm

Venue : Sofia on 6th March & Belgrade on 8th March,

Course Language

English (Simultaneous translation will not be available)

Course Level

All Levels

Course Fee**Registration Fees (Workshops) per person**

	University	Early Registration (On and before 15th February)	Walk – In
Delegate	Free	75 USD	100 USD

*Please note that **VAT is not included**

Note : Datamine Software download ID and Password will be issued to registered participants to download Datamine software applications from Datamine website.

Participant will also has privilege for 10days free license of Datamine Products. Registered Participants will be requested to send HD serial no. of their computer system for the license generation.
